Please use only vanilla JavaScript and CSS to make the changes.

Task 1

Go to https://assetstore.unity.com/?orderBy=5&rows=96 and select a category on the right. Write the code that will
highlight any prices above €20 red within the product grid. Your code should continue to work when users select/deselect categories on the right. An example of what this should look
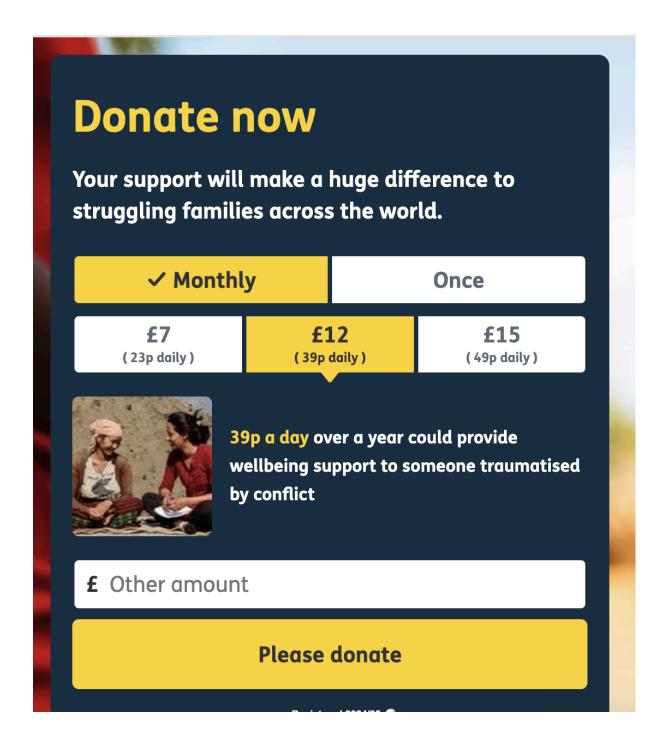

like is shown in the screenshot below (note the products will vary depending on filters
selected):

Task 2

Make the default price to be the middle rather than the first one when users land (for both Monthly and Once tab).

https://www.tearfund.org/campaigns/practise-what-you-pray

Task 3

Create a page which contains the content of the Modal.

- Create it in a <div> element with id "cv-modal".
- The countdown at the top should start at 2 minutes (2:00) and countdown each second until 0:00. It should then continue to show 0:00.
- We are looking for this to be as close to pixel perfect as possible, and please ensure that it displays correctly in IE11 and above.

Note: we are looking for good practice HTML and CSS in this answer, therefore please avoid the use of absolute positioning wherever possible.
